

UMASS Amherst Town Solar Survey for Montague Residents

All residents (owners & renters) of the Town of Montague, including Turners Falls, Millers Falls, Lake Pleasant, Montague City & Montague Center are invited to take the UMass solar survey online at tinyurl.com/MontagueSolar or by using the QR code on the flier, by printing out the attached survey, or by picking up a printed copy at Town Hall, any of our libraries, or the Senior Center (limited numbers of copies are at these locations).

The survey is a collaboration between the town and UMass Clean Energy Extension and their students, to help our community plan for the future of solar. It is expected to take about 15 minutes to complete.

Printed copies of the survey can be mailed to UMass (address is on page 1 of the survey) or left in a drop box/envelope at Town Hall, any of our libraries or the Senior Center by April 7th. Or you can take the online survey through April 14th.

If you have questions about survey participation and consent, please contact Dwayne Breger (energyextension@umass.edu, 413-545-8510). If you have other questions about this project, please contact River Strong (gcstrong@umass.edu, 413-545-8513).

Thanks for sharing your attitudes and preferences on the future of solar in our villages,

Montague Solar Planning Committee
